How To Install Dome PTZ Camera

Step 1 : Check the installation environment to ensure it meets the following conditions.
(1) The thickness of the wall should be sufficient to install expansion screws.
(2) The wall should be able to support at least 8 times the weight of accessories such as smart balls and brackets.
(3) Check the brackets and expansion screws, as well as other accessories.

Step 2: Drill holes and install expansion screws.
Mark and drill 4 Ø12 holes for the expansion screws at the designated positions on the wall brackets. Insert M8 expansion screws into the drilled holes.

Step 3: Bracket fixed.
After the cable is threaded out of the bracket, tighten 4 nuts onto the expansion screws.
