02 Camera Introduction

Step 1: Turning on the Camera

Power up using the USB DC adapter included in the box.

After powering on for the first time, it will perform a self-check rotation and the indicator light will light up.

LED indicator

Step 2: Resetting the device

Please press and hold the reset button for **8-10 seconds** before connecting the camera, wait a few seconds for the voice prompt.

After successful reset, the device will perform self check rotation, and the indicator light will flash.

TF Card: It is recommended to use a genuine TF card with a capacity of 32-128GB, Class 10, 32FAT format ,which is suitable for camera use.

Reset Button

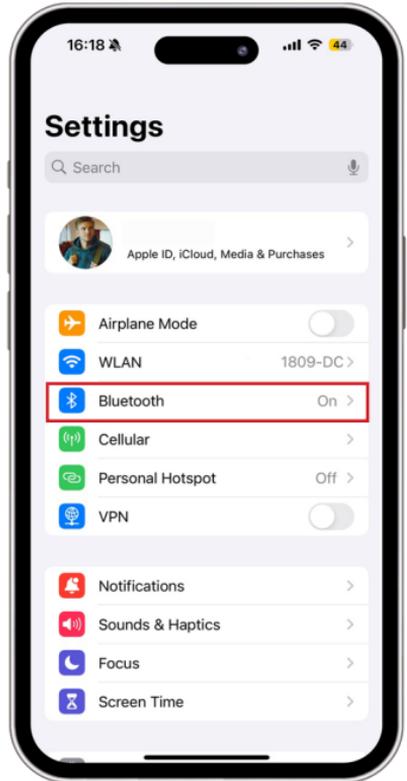

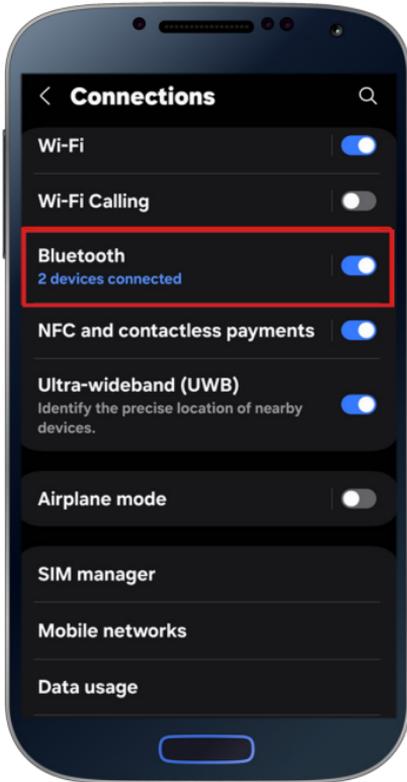

TF Card Slot

Note: Please reset the device before each reconnection. It is recommended to place the device near the router for the initial connection.

03 Set up the Camera -Plan A (Bluetooth)

First, please turn on the Bluetooth function on your phone.

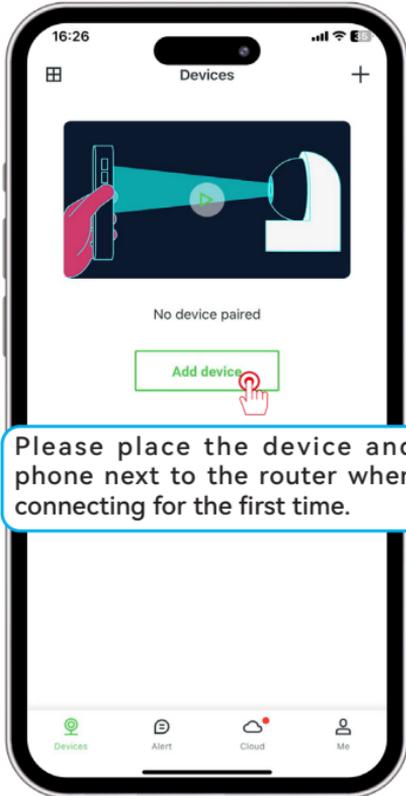

Android

iOS

Then run the "AJCloud" APP to connect to the camera.

Please place the device and phone next to the router when connecting for the first time.

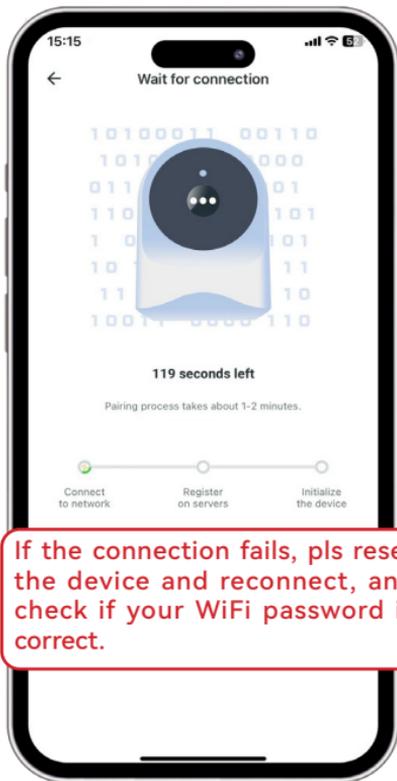

After turning on the phone's Bluetooth, it will automatically search for nearby devices.

If the bluetooth cannot find the device, pls reset the camera and try to search for it again.

You can also use "Plan B" to add the camera. Refer to page 10.

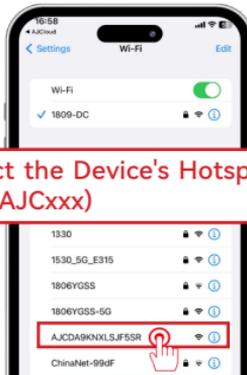

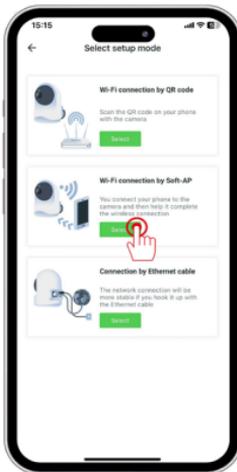

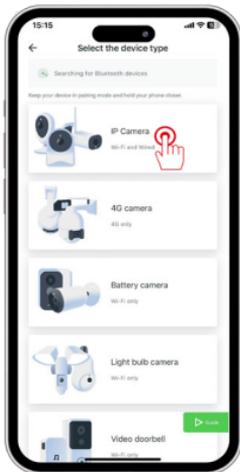

The WiFi password should not be too long or contain too much special characters.

If the connection fails, pls reset the device and reconnect, and check if your WiFi password is correct.

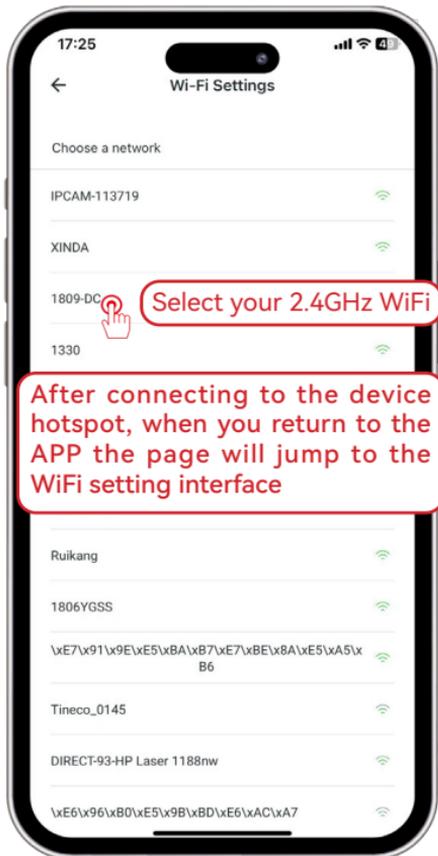

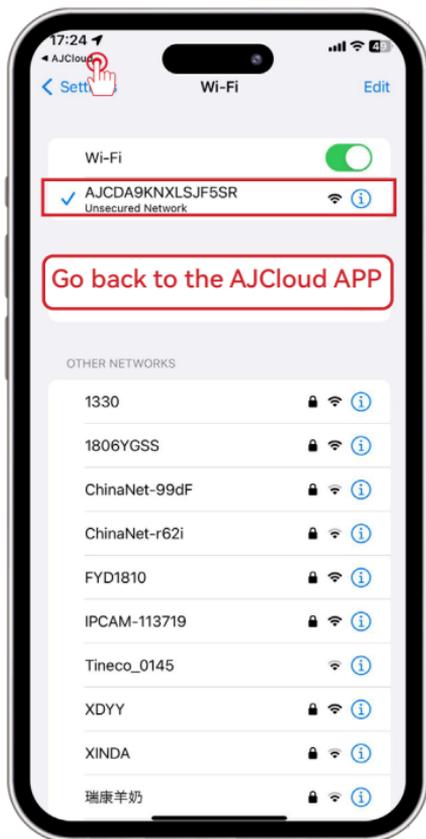

* For detailed connection methods of Plan B, please refer to page 10.

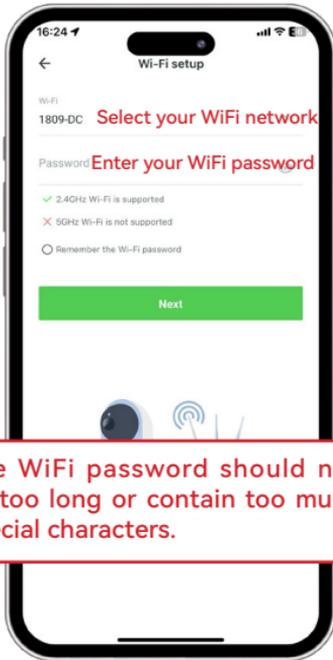

04 Set up the Camera - Plan B (Soft-AP/Hotspot connection)

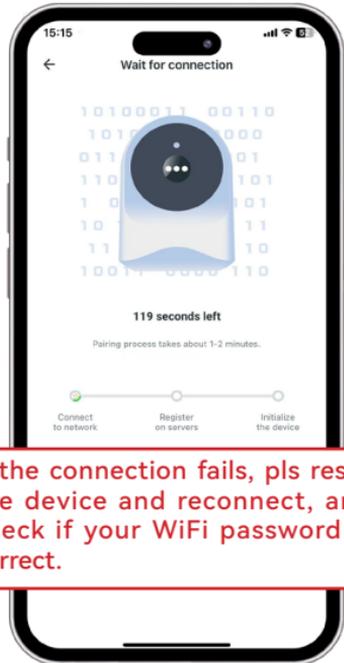

Select the Device's Hotspot.(Star with AJCxxx)

If you cannot find the device's hotspot, pls reset the device and try again.

The WiFi password should not be too long or contain too much special characters.

If the connection fails, pls reset the device and reconnect, and check if your WiFi password is correct.

*You can also scan the QR code below to watch the connection video or contact customer service.

05 Test the Signal and All Set-up

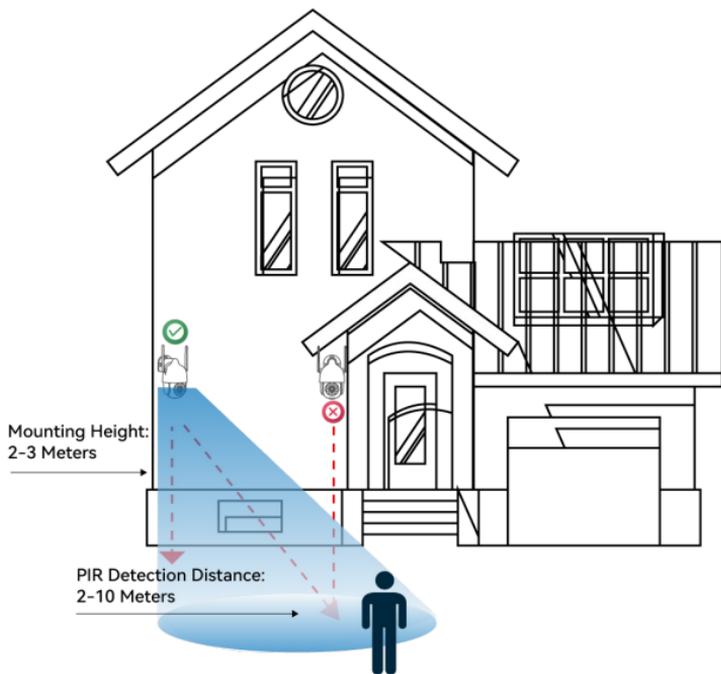

If the WiFi signal is weak, move the camera to test again until it's strong

*If you would like to know more detailed product information, please visit our official website to download the detailed user manual.

06 Install the Camera

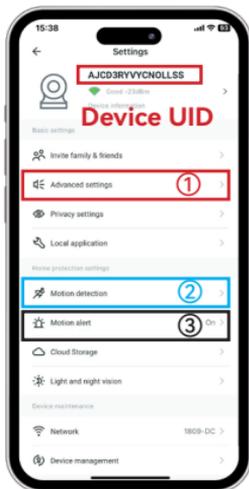

- For outdoor use, the camera MUST be installed upside down for better waterproof performance and better PIR motion sensor's efficiency.
- Install the camera 2-3 meters (7-10 ft) above the ground. This height maximizes the detection range of the PIR motion sensor.
- For better motion detection performance, please install the camera angularly.

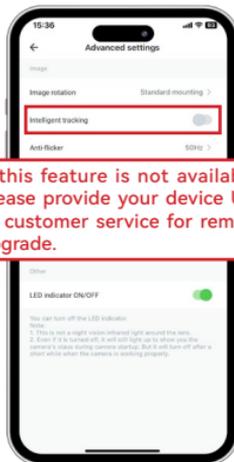

NOTE: If a moving object approaches the PIR sensor vertically, the camera may fail to detect motion.

07 Introduction to basic functions

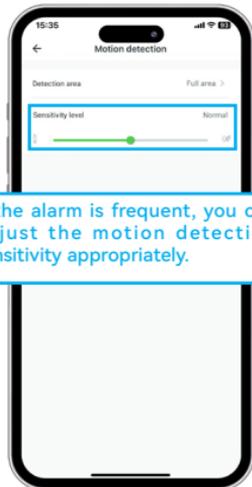

① Turn on Intelligent tracking.

If this feature is not available, please provide your device UID to customer service for remote upgrade.

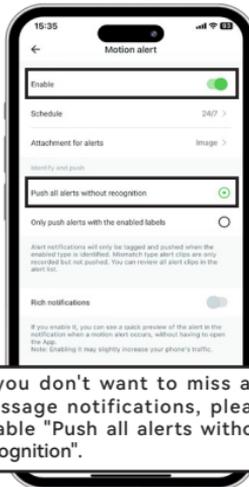

② Adjust motion detection sensitivity.

If the alarm is frequent, you can adjust the motion detection sensitivity appropriately.

③ Set alarm time period and alarm notification form.

If you don't want to miss any message notifications, please enable "Push all alerts without recognition".

08 FAQ

(1) The camera cannot connect to WiFi:

1. Make sure the camera is powered on properly. (If there is an indicator light on the camera).
2. When connecting for the first time, it's recommended to press and hold the camera reset button 8s-10s to reset.
3. An overly long WiFi password or one that includes special symbols may prevent the app from properly recognizing the password.

Warm reminder: Some cameras only support 2.4GHz WiFi and do not support 5GHz WiFi.

(2) The camera disconnected while in use:

1. The camera is too far from the router, causing poor WiFi signal reception. Pls take the camera to the router for resetting and re-adding, and check if the WiFi signal value is stable.
2. There are other interference between the camera and the router, such as walls, glass, and other electronic products.
3. The camera is not powered on properly. Please replace the power supply and try again.
